

**Jenny Shone**

*International Animal Communicator, Speaker, Educator and Author*

***Learn practical uses for your telepathic communication skills.***

*This is for those of you that have completed the level 1 and want to take your communication skills further.*

During this workshop we will take our telepathic skills to a much deeper level and will learn the art of working with missing animals using telepathic techniques. Will combine a few different techniques in order to get as much information as possible to assist us with missing animals as well as learn techniques of how to guide them home and keep them protected while they are missing.

We will also focus on learning to do an “Intuitive Medical Body Scan” to find possible abnormalities inside the animals.

This goes to a much deeper level as to what we do on the level 1 workshop as far as finding possible health issues in our animals goes. We explore the organs of the animals. However please note we are not vets so this can't be used to diagnose health conditions or prescribe medications but it can give us a deeper understanding of what is wrong with our animal friends and gives us a place we can ask our vets to investigate.

This workshop is quite intense but still a lot of fun and once completed you will have some new techniques to practice and perfect so that you can be in a much better position to help your animals if the need should arise.

**Date:** 15<sup>th</sup> September 2018

**Venue:** 47 Turaco Street, Norscot, Fourways.

**Time:** 09h00

**Cost:** R800.00 pp (This is a special September price)
